CAREER OBJECTIVE

As an Information Science student with a passion for developing innovative software solutions and creative websites, Seeking a Software Developer or Web Developer position in the Information Technology industry. I aim to utilize my strong programming skills, effective collaboration, clear communication, and problem-solving abilities to contribute to impactful projects.

EDUCATION QUALIFICATION

- **Bachelors of Engineering – Information Science and Engineering**
  CMR Institute of Technology, AECS Layout, Bangalore
  6.55 CGPA , 2026 [Pursuing]
- **12th–Science**
  Narayana Junior College, Vijayawada, Andhra Pradesh 520010. 60%, 2022
- **SSLC**
  Viswabharathi Wisewoods , Gudivada 521301.
  75%, 2020

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript
Web Technologies: HTML, CSS
Tools & Platforms: Visual Studio Code, Android Studio, Git, Postman, Firebase Console.
Cybersecurity: Malware detection and analysis, familiarity with secure coding practices.
Database: MySQL, MongoDB.
Networking: Basic networking principles (CCNA concepts).
Operating Systems: Windows, Mac, Debian (Linux, Parrot OS, Ubuntu), Black Arch.

PROJECTS

- **Title: Malware Detection and Analysis Tool**
  Description: Designed and implemented a GUI-based malware detection application in Java to identify and analyze potentially harmful files. Utilized heuristic techniques to scan file behaviors and patterns for malicious signatures. The system provides detailed analysis reports and activity logs to assist in understanding threat vectors. Built with scalability in mind, enabling easy integration of additional detection rules or scanning modules. The user interface allows intuitive file selection and real-time scanning feedback.
  Technologies: Java, Java Swing, Heuristic Analysis.

- **Title: Sentimental analysis on Twitter using NLP**
  Description: Sentimental Analysis on Twitter using NLP" is a project that analyzes emotions, opinions, and public attitudes expressed in tweets using Natural Language Processing (NLP) techniques. It classifies tweets into Positive, Negative, or Neutral categories by applying preprocessing steps such as tokenization, stopword removal,

stemming/lemmatization, and noise cleaning. After feature extraction using methods like TF-IDF or word embeddings, machine learning and deep learning models such as LSTM or RoBERTa are trained for accurate sentiment classification. The system can be integrated with a real-time GUI to instantly predict sentiment from live Twitter data.

Technologies: Python(Back end),Rest api, NLTK, Scikit-learn, TensorFlow (LSTM), Hugging Face Transformers (RoBERTa), Twitter API, React.js(Front end)**.**

- **Title: Intrusion Detection System (IDS) with Snort**

  Description: Configured and deployed an Intrusion Detection System using Snort to detect network threats and anomalies. The system was tested in a virtual lab environment built with VirtualBox, running Kali Linux and target machines. Utilized Wireshark for network traffic analysis and rule tuning. Developed custom Snort rules to identify port scans, brute-force attacks, and suspicious payloads. Alerts were logged and visualized to assist in incident response.

  Technologies: Snort, Wireshark, VirtualBox, Kali Linux, TCP/IP protocols

- **Title:** JWT Token Security Analysis & Attack Simulation Lab

  Description: Developed a hands-on cybersecurity lab focused on analyzing, exploiting, and securing JSON Web Token (JWT)–based authentication systems. The project simulates real-world JWT vulnerabilities such as algorithm confusion (alg:none), weak secret brute-forcing, token tampering, privilege escalation, and token replay attacks within a controlled environment. Implemented defensive mechanisms including signature verification, claim validation, token expiration checks, issuer and audience validation, and secure token handling practices. The lab demonstrates both red-team attack techniques and blue-team mitigation strategies aligned with real-world API security scenarios.

  Technologies: Python, Flask, PyJWT, JWT, API Security, Authentication & Authorization, SQLite, OWASP API Security

---

CO-CURRICULAR ACTIVITIES

- **Online Courses & Certifications:**
  - Currently pursuing CEH certification under EC-Council.
  - Networking Basics Netacad Cisco Network Academy
  - Ethical Hacker from Netacad Cisco Network Academy
- **Hackathon:**

  Synchrony Infosec University Hackathon 2025.

  SIH(Smart India Hackathon)-2025 conducted by Indian Government
- **Patents & Copy rights:**
  - Filed a patent for an innovative bottle design , InjectP.
  - Published a **irjmets research paper** on **Sentimental analysis on Twitter using NLP**

PERSONAL DETAILS

Date of Birth	: 10-08-2003
Gender	: Male
Nationality	: Indian
Permanent Adress	: 1-2 Polepalli , Ramagiri ,Anantapur, Andhra Pradesh - 515101
Languages	: Telugu , English , Kannada ,Hindi
Hobbies	: Reading books, playing games, Traveling,Reading Newspaper
